

Fleece Blanket Instructions

Steps to Blanket Construction

1. Cut off the edge of the fleece that has the manufactured edge.
2. Lay the two pieces of fleece on top of each other and even out the top and bottom so both pieces of fabric are the same size.
3. Use the square stencils to cut out 5" x 5" pieces of fleece in all four corners of both pieces of fleece.
4. Make fringe strips on all four sides of both pieces of fleece by cutting approximately 1" strips 5" deep. The depth of the strips will equal the 5" used for the corner squares. (TIP: Cut through both layers of fabric at the same time).
5. With your blanket lying flat and all the fringes lined up, tie top and bottom layer strips together with a double knot, ensuring the knot is close to the body of the blanket. Work all around the blanket until finished.
6. You are done!
